

The Value of Clean-Up Days in Al Tahoe

A demonstration on how to prepare defensible space around an Al Tahoe resident's home was conducted on our "first" clean up day in 2020. A senior/disabled homeowner's property was selected to have their property "hardened" and made "fire resistant" by the Tahoe Douglas Zephyr Fire Department and South Lake Tahoe Fire Rescue crew members.

This "Demo" house provided residents with an example of what neighbors can do to provide defensible space around their homes to protect life and property in the event of a wildfire.

Thank you, Crews, for the tree and brush removal, trimming, thinning, and chipping, the removal of lumber, wood piles and combustible materials around the home, and the raking of "3 dump load trucks" full of pine needles and debris from the yard and roof of this property.

"Before, During, and After" pictures tell the story of this event!
